Product Fact Sheet

#143

D.F.E.

ULTRA-STRENGTH, BIO-ENZYMATIC GELLED DRAIN TREATMENT

DESCRIPTION

D.F.E. is a thickened concentrated gel that clings to pipes and traps, coating the organic material. Aerobic and anaerobic bacterial strains rapidly multiply as they digest the food source, doubling in number every 20 minutes, until the food source is gone. The active ingredient remains dormant until exposed to organic soil. Green in color with a pH of 7.5

WHAT DOES IT DO?

Helps to reduce drain fly reproduction. Eliminates odor caused by spoiled food, vomit, decomposed animals and waste receptacles when sprayed directly on malodor and bacteria action is allowed to work. The added fragrance will quickly neutralize any odor.

WHY IS IT USED?

D.F.E. is easy to use and can be used in restaurants, bars, kitchens, hospitals, nursing homes, prisons, funeral homes, apartments, kennels, clinics, porta-toilets, marinas, septic tanks, or wherever organic matter is present in drains. Contains no insecticides or poisons. Non-toxic, non-acid, non-alkaline, non-pathogenic, non-polluting. Will not harm plastic, metal or glass plumbing.

HOW IS IT USED?

Recommended Use Directions

- For drain flies: Use 6 oz. per drain, typically at night, after you are done running water through the drains, for three consecutive nights.
- Use undiluted to eliminate odor caused by spoiled food, vomit, decomposed animals, and waste receptacles. Spray directly on malodor and allow bacteria action to work.
- Grease traps: Pour directly into sink or pipe closest to trap, typically at night. Flush down with a cup of lukewarm water. Use 4-5 ounces daily.

PACKAGING

This product is available in 1 quart containers.
