Product Fact Sheet

#315

DRI-BRITE

HIGH PERFORMANCE RINSE AGENT

DESCRIPTION

DRI-BRITE is a concentrated premium liquid rinse additive and drying agent for spot-free dinnerware. Dark blue in color with a pH of 7-8.

WHAT DOES IT DO?

DRI-BRITE reduces surface tension so that water “sheets off” on dishes, glasses, silverware and utensils resulting in spotless, streak-free dry surfaces.

WHY IS IT USED?

DRI-BRITE is designed for problematic water conditions, induces rapid sheeting and spot-free drying, and wipes out need for toweling.

HOW IS IT USED?

DRI-BRITE is designed for use in all types of injection units in the final rinse. For both high and low temperature dishmachine operations.

For other quick drying applications where foam cannot be tolerated, use one teaspoon of DRI-BRITE in four gallons of hot water. Submerge utensils for 5-10 seconds, then allow to air dry.

PACKAGING

This product is available in 1 gallon, 5 gallon and 55 gallon containers.
