DESCRIPTION

Concentrated and effective liquid rinse additive and drying agent that eliminates all water spots from glasses, dishes, silverware and utensils. Blue in color with a pH range of 7-8.

WHAT DOES IT DO?

RAPID RINSE is a drying agent designed to be automatically metered into the final rinse cycles of automatic dishwashers. A non-ionic surface active agent. It reduces surface tension to speed surface drainage and provides a positive aid to sanitation. RAPID RINSE will work best at rinse temperatures of 180°-190°.

WHY IS IT USED?

RAPID RINSE drying agent is a concentrated product for the final rinse cycle in high and low temperature dishwashing machines. Wipes out need for toweling. Designed for all types of rinse injection units.

HOW IS IT USED?

For quick drying applications, where foam cannot be tolerated, use one teaspoon of RAPID RINSE in 4 gallons of hot water. Submerge utensils for 5-10 seconds, and then allow to air dry.

PACKAGING

This product is available in 1 gallon, and 5 gallon containers.
