## Product Fact Sheet

#340

### SPARKLE

LIQUID PRE-SOAK FOR SILVERWARE - FLATWARE

#### DESCRIPTION

SPARKLE is a concentrated liquid pre-soak detergent and de-tarnishing agent. It removes tough food soils from stainless flatware or silver. Reddish brown in color with a pH of 13.

#### WHAT DOES IT DO?

SPARKLE removes tough food soils from stainless flatware or silver such as egg yolk, dried on ketchup, berry soil and others.

#### WHY IS IT USED?

Special electrochemical conversion ingredients allow tarnish or smut to be removed safely from your fine silver. The stainless and silver will shine as never before.

#### HOW IS IT USED?

**Stainless Flatware:** Prepare a very hot water solution containing 1-2 oz. of SPARKLE per gallon of water in a dishpan. Soak flatware for several minutes in the solution, sort and place stainless in utensil cups and cycle through your dishwasher.

**Silverware:** Line a dishpan with clean aluminum foil or place clean, de-tarnishing plates in the bottom. Prepare a solution of 1-2 oz. of SPARKLE per gallon of very hot water in a dishpan. Immerse silverware completely in solution and allow to soak for several minutes. Remove and rinse thoroughly, place in utensil cups and cycle through your dishwasher.

#### PACKAGING

This product is available in closed loop, 1 gallon and 5 gallon containers.
