Providing continuous air purification, this permanently mounted unit is perfect for spaces without HVAC duct access. pureAir 750+ Wall Mount features the same active air purification technology developed and used by NASA.

Advanced Oxidation Processes (AOPs) are propelled out into your space to hunt down particulates. At the same time, negative ions go out and charge particles such as dust, pollen and pet dander, causing them to drop out of your breathing space.

Active Radiant Catalysis (ARC®), this proprietary photocatalytic oxidation (PCO) technology uses energy to activate a catalyst, turning moisture into products that continuously clean your space.

With a reactive surface area more than 16x greater than the competition, pureAir 750+ Wall Mount continuously purifies your space. The result is the reduction of allergens from pets, pollen, and smoke, as well as odors from mold, mildew, and more.
