Terminator

WASP & HORNET KILLER

EPA Reg. No. 67603-11-34714

DESCRIPTION:

TERMINATOR is an instant kill pesticide meant for use on wasps, hornets, and yellow jackets. Can be used both indoors (attics and other places where nests are built) and outdoors on wasp and hornet nests.

WHAT DOES IT DO?

TERMINATOR gives knockdown and kills aggressive wasps and hornets. It kills with residual action as wasps and hornets return to the nest. When used correctly, TERMINATOR prevents re-nesting when the nest is thoroughly saturated. "They won't be back!"

WHY IS IT USED?

This product sprays up to 20 feet away from the target, meaning the user can distance themselves from the nest. TERMINATOR works quickly for an instant kill.

HOW IS IT USED?

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift. Shake Well Before Using.

Recommended PPE: Chemical goggles, safety glasses with side shields or vented/splash proof goggles. Wear gloves, long sleeved shirt, long pants and other protective clothing as required to minimize skin contact. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker, a respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed.

When used indoors: Do not allow adults, children, or pets to enter the treated area until vapors/mists/aerosols have dispersed, sprays have dried, and the treated area has been thoroughly ventilated; and remove pets/birds and cover fish aquariums before spraying.

Not for broadcast use on indoor surfaces. Do not apply when food is present. Cover or remove exposed food. Remove or cover dishes, utensils, food processing equipment and food preparation surfaces, or wash them before use. Do not use in commercial food/feed handling establishments, restaurants, or other sites where food/feed is commercially prepared or processed. Not for use in

federally inspected meat and poultry plants. Do not apply to pets or contaminate feed, foodstuffs, dishes, or utensils. Avoid directly spraying vegetation.

When used outdoors: Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. All outdoor applications must be limited to only spot or crack-and-crevice treatments, except for the following permitted uses:

1. Treatment to soil or vegetation around structures
2. Applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches, and structural surfaces (such as windows, doors and eaves) are limited to only spot and crack-and-crevice applications.

Do not water treated area to the point of runoff. Do not make applications during rain.

Read Entire Label

- For best results, spray in early morning or late evening when insect activity is minimal.
- Stand a safe distance from nest and not directly underneath. May cause staining (darkening) of asphalt surfaces and shingles.
- Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual action will keep wasps and hornets from returning to the nest.
- Wait at least 24 hours before removing the nest.

To Kill Bees, Hornets, Yellow Jackets and Wasps under eaves, screens, window frames, doors, patios, cracks, holes, or crevices or wherever insects are noticed:

Spray for about 1-2 seconds where insects enter, such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

PACKAGING:

TERMINATOR is available in 20 oz. aerosol cans. 12 cans/case.
